

WE CARE FOR your safety

-  We have placed Amuki logos on the floor to guide you and help you keep your distance.
-  Masks are a must for all.
-  Wonderdal and all equipment are sprayed, wiped and sanitized every hour to ensure everyone's safety and peace of mind.
-  Specialized silver ion technology transparent overlays cover all of the screens in Wonderdal. This powerful technology repels 99% of bacteria - we also physically clean and sanitize these screens every 60 minutes.
-  We use Microtol sanitizer. This product is widely used in hospitals around South Africa and parents and children can rest assured of its effectiveness and safety - it also doesn't dry out your skin!
Please encourage your little ones to make use of the multiple sanitizer dispensers easily found inside and outside of Wonderdal.
-  Please be sure to inform the Wonderpals should your child be feeling unwell at any point or showing cold/flu like symptoms. Together we keep each other safe.
-  Please be aware that should a child display any of the symptoms of COVID-19 while inside Wonderdal, we will contact their parent and kindly request the child to be collected.
-  Please encourage social distancing.
We have adjusted our policies and allow smaller groups of children for every play slot.
-  We have 2 separate areas for dropping and collecting children.
Please follow the signs.
-  All our Wonderpals have been trained in the management of COVID-19 procedures. Please feel free to ask for assistance at any time.
